

The American Recovery and Reinvestment Act of 2009 requires:

- The payment of Prevailing Wages
- Monthly reporting of employment new hires and dollars paid
- Projects over \$25 million may be subject to a PLA

LCPtracker, a web software tool that provides electronic submission of certified payroll and creates the new hire reports automatically in a secure, paperless format. Contractor Compliance and Monitoring, Inc. reviews the certified payroll, checking that proper wages are paid by all contractors and that only approved apprentices perform work on the project, reviews job creation reports and submits those reports on behalf of your agency to the appropriate federal agency each quarter.

Services include a webinar meeting for each construction project to educate contractors as to these compliance requirements.
